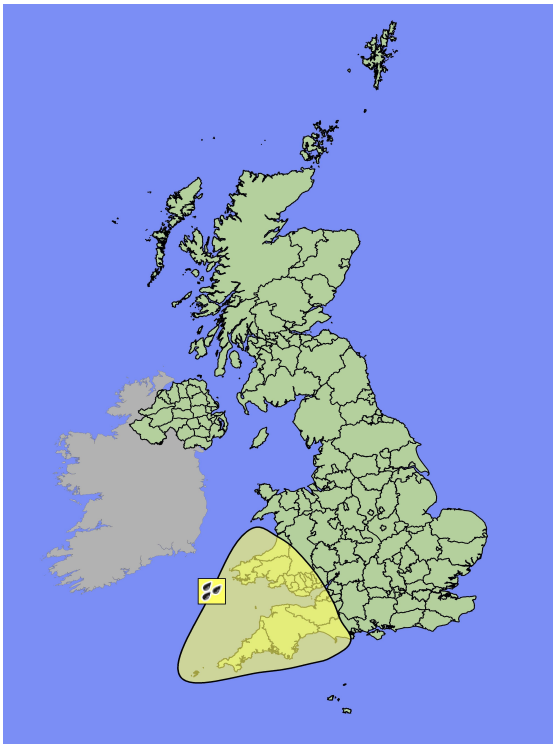
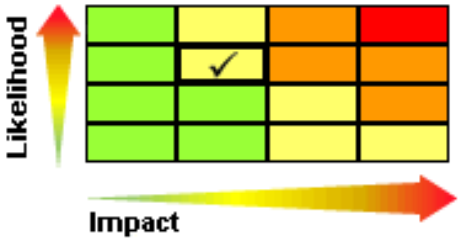
# National Severe Weather Warning Service





**Chief Forecasters Assessment**
There is a trend towards a slower northeastwards progression of the frontal system bringing the rain during Sunday, with impacts most likely later in the evening and during Monday. An additional 20-30 mm of rain could fall quite widely in the highlighted area with a risk of 60 mm or more over high ground, leading to localised flooding, especially where the ground is saturated due to recent wet weather.

Given the uncertainty over the detail, the Public are advised to monitor forecasts closely and visit the web site for any updates.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **18:00 on Sun, 07th Oct 2012** until **23:59 on Mon, 08th Oct 2012**

Further periods of rain, some heavy, are expected to affect more southwestern parts of England and Wales later on Sunday and during Monday.

The public should be aware of the possibility of disruption to travel due to localised flooding.

**For more details please go to:**
